

REMARKS

As a preliminary matter, Applicant's representative would like to thank the Examiner for courtesies extended in the personal interview conducted on November 2, 2006.

An Examiner's Interview Summary Record (PTOL-413) was provided by the Examiner at the interview on November 2, 2006.

Applicant submits this Statement to comply with the requirements of M.P.E.P. § 713.04.

In the interview, the following was discussed:

A. Identification of claims discussed:

Claim 17.

B. Identification of prior art discussed:

U.S. Patent No. 6,756,187 and U.S. Patent Application Serial No. 11/329,452.

C. Identification of principal proposed amendments:

Applicant's representative proposed several minor editorial amendments in response to the Examiner's rejections under 35 U.S.C. §112. Additionally, Applicant's representative proposed two separate claim amendments with respect to the Examiner's double patenting rejections.

Specifically, Applicant's representative proposed amending claim 17 to recite, inter alia, "*deforming said organic layer to a thin deformed organic layer through a*

reflow for making said organic layer laterally extend at a substrate temperature from 15 degrees to 40 degrees centigrade”.

Alternatively, Applicant’s representative proposed amending claim 17 to recite, inter alia, “*reflowing said patterned organic layer at a substrate temperature from 15 degrees to 40 degrees centigrade while being exposed to an organic solvent-carrying gas”.*

D. Brief Identification of principal arguments:

Applicants’ representative respectfully pointed out that neither U.S. Patent No. 6,756,187 and U.S. Patent Application Serial No. 11/329,452 taught or suggested the above-proposed features of the claimed invention.

E. Results of the Interview:

The Examiner indicated that the above-proposed claim amendments would not likely overcome the double patenting rejections.

The Examiner reminded Applicant’s representative that the double patenting rejections could be overcome by timely filing a terminal disclaimer.
